Executive Summary

The City of Prescott (City) retained the team of Raftelis Financial Consultants, Inc.¹ (RFC or Raftelis) and Elliott D. Pollack and Company (EDPCO) to complete an update of the City's development impact fees for compliance with the requirements of Arizona Revised Statutes (ARS) § 9-463.05 effective August 1, 2014.

Under the updated requirements of ARS § 9-463.05 a development impact fee study is segmented into three major components as follows:

1. Land Use Assumptions (LUA) identify the current and projected service units by service area. The City LUA is summarized in a separate document dated February 25, 2014 and outlines the projected growth in residential population and housing units and non-residential employment and 1,000 square feet.
2. Infrastructure Improvements Plan (IIP), summarized in the document dated February 25, 2014, identifies the current and future facilities to serve the projected growth in service units identified within the LUA.
3. Development Impact Fee report (Fee Report), the subject of this document, outlines the proposed development impact fee by fee category and service area incorporating the IIP eligible facilities and service units identified in the Final LUA and IIP dated February 25, 2014. The Fee Report incorporates capital funding analyses, offset calculations and cash flow projections for the proposed development impact fees.

To ensure that new development contributes its proportionate share towards the cost of public facilities, the City of Prescott (City) has enacted development impact fees for a variety of fee categories². The fees were most recently updated in November 2011 with recreation and public building fee categories eliminated as a result of ARS § 9-463.05 adopted earlier in 2011. The purpose of the overall study is to update the following City's development impact fee categories:

- Fire and Emergency Medical Services (EMS)
- Police
- Streets³
- Water System
- Water Resources
- Wastewater System

Table 1 summarizes the current and draft single-family and multi-family residential development impact fees for Fire and EMS and Police fee areas.

¹ The City initially retained Red Oak Consulting, an ARCADIS group, to complete this study and the contract was subsequently assigned to RFC in July 2013.

² The City's library and park development impact fees will be discontinued by August 1, 2014.

³ The Street fee category and improvements were evaluated as part of the study. The City does not have additional planned, expansionary capital improvements eligible for reimbursement and therefore the Streets fee category is recommended to be discontinued.

**Table 1
Current and Draft Residential Fire and EMS
and Police Development Impact Fees**

Fee Category	Residential Development Impact Fee per Housing Unit		
	Current	Draft Fee	Change
Fire & EMS	\$525	\$319	(\$206)
Police	589	114	(475)

Table 2 summarizes the range of current and draft non-residential development impact fees for Fire and EMS and Police fee areas. The range will vary based on development type included in Appendices A and B.

**Table 2
Current and Draft Non-Residential Fire and EMS
and Police Development Impact Fees**

Fee Category	Non-Residential Development Impact Fee per 1,000 Square		
	Current	Draft Fee	Change
Fire & EMS	\$0	\$218 to \$718	\$218 to \$718
Police	0	78 to 256	78 to 256

Tables 3, 4 and 5 summarize the current and draft 5/8-inch by 3/4-inch water system, water resource and wastewater system development impact fees, respectively by service area. Separate Water System, Water Resource and Wastewater System service areas are identified within the Final IIP as detailed within this report and Appendices C, D and E. Water system, water resource and wastewater system development impact fees will be increased for 3/4-inch and higher meter sizes based on the American Water Works Association (AWWA) meter capacity relationships.

**Table 3
Water System
Current and Draft Development Impact Fees**

Water Service Area	Current Fee (5/8" x 3/4")	Total Fee (5/8" x 3/4") By Service Area	Change
A	\$5,389	\$827	(\$4,562)
B	5,389	2,263	(3,126)
C	5,389	2,389	(3,000)
D	5,389	2,332	(3,057)
E	5,389	4,090	(1,299)
F	5,389	2,734	(2,655)
G	5,389	3,595	(1,794)
H	5,389	3,461	(1,928)
I	5,389	3,233	(2,156)
J	5,389	4,072	(1,317)

**Table 4
Water Resource
Current and Draft Development Impact Fees**

Water Resource Service Area	Current Fee (5/8" x 3/4")	Total Fee (5/8" x 3/4") By Service Area	Change
A	\$4,945	\$1,481	(\$3,464)

**Table 5
Wastewater System
Current and Draft Development Impact Fees**

Wastewater Service Area	Current Fee per Fixture Unit (1)	Total Fee (5/8" x 3/4") By Service Area	Change
A	\$1,800	\$193	(\$1,607)
B	1,800	3,325	1,525
C	1,800	2,156	356
D	1,800	2,055	255
E	1,800	3,325	1,525
F	1,800	3,407	1,607
G	1,800	3,562	1,762
H	1,800	3,361	1,561
I	1,800	1,989	189

(1) Assumes approximately 32 fixture units and \$56 fee per fixture unit

Fee Implementation

In order to continue to assess a development impact fee after August 1, 2014, ARS § 9-463.05 dictates that the fees be updated to meet the requirements of the development impact fee statute; development impact fees that have not been updated for the current requirements may no longer be assessed⁴.

City staff is recommending implementation and effective dates for draft development impact fees by fee category as follows:

- August 1, 2014
 - Water System
 - Water Resources
 - Wastewater System
- Date to be determined at City Council's discretion
 - Fire and Emergency Medical Services (EMS)
 - Police

A delayed effective date for Fire and EMS and Police development impact fees is recommended based on (1) the uncertainty of available funding for current development or non-growth portion of identified IIP facilities and (2) the risk that the City will be required to refund fees collected after August 1, 2014 if the identified facilities are not constructed. Due to the uncertainty of funding, City Council may determine an effective date of draft Fire and EMS and Police development impact fees after August 1, 2014. As a result, the City will not be able to assess a Fire and EMS development impact fee between August 1, 2014 and the future date to be determined by City Council.

⁴ Previously adopted fees pledged for the repayment of outstanding debt, subject limitations and restrictions, may continue to be assessed.

Introduction and Overview

The City of Prescott (City) retained the team of Raftelis Financial Consultants, Inc.⁵ (RFC or Raftelis)) and Elliott D. Pollack and Company (EDPCO) to complete an update of the City's development impact fees for compliance with the requirements of Arizona Revised Statutes (ARS) § 9-463.05 effective August 1, 2014.

Under the updated requirements of ARS § 9-463.05 a development impact fee study is segmented into three major components as follows:

1. Land Use Assumptions (LUA) identify the current and projected service units by service area. The City LUA is summarized in a separate document dated February 25, 2014 and outlines the projected growth in residential population and housing units and non-residential employment and 1,000 square feet.
2. Infrastructure Improvements Plan (IIP), summarized in the document dated on February 25, 2014, identifies the current and future facilities to serve the projected growth in service units identified within the LUA.
3. Development Impact Fee report (Fee Report), the subject of this document, outlines the proposed development impact fee by fee category and service area incorporating the IIP eligible facilities and service units identified in the Final LUA and IIP dated February 25, 2014. The Fee Report incorporates capital funding analyses, offset calculations and cash flow projections for the proposed development impact fees.

To ensure that new development contributes its proportionate share towards the cost of public facilities, the City of Prescott (City) has enacted development impact fees for a variety of fee categories⁶. The fees were most recently updated in November 2011 with recreation and public building fee categories eliminated as a result of ARS § 9-463.05 adopted earlier in 2011. The purpose of the overall study is to update the following City's development impact fee categories:

- Fire and Emergency Medical Services (EMS)
- Police
- Streets⁷
- Water System
- Water Resources
- Wastewater System

Table 6 summarizes the City's current non-utility development impact fees. The City's Library and Park development impact fees will be phased out by August 1, 2014 with existing fund balance being

⁵ The City initially retained Red Oak Consulting, an ARCADIS group to complete this study and the contract was subsequently assigned to RFC in July 2013.

⁶ The City's library and park development impact fees will be discontinued by August 1, 2014.

⁷ The Street fee category and improvements were evaluated as part of the study. The City does not have additional planned, expansionary capital improvements eligible for reimbursement and therefore the Streets fee category is recommended to be discontinued.

used to fund future growth-related improvements. Based on the adopted City policy, current fees are assessed only to residential developments.

**Table 6
Non-Utility
Current Development Impact Fees**

Fee Category	Residential Per Residential Unit	Non-Residential Per Sq. Ft.
Fire	\$525	\$0.000
Police	589	0.000
Parks	715	0.000
Library	253	0.000
Streets	469	0.000
Subtotal	<u>\$2,551</u>	<u>\$0.000</u>

Table 7 summarizes the City’s current water and water resource development impact fees which were last updated in 2006. Current wastewater system development impact fees are assessed at \$56 per fixture unit.

**Table 7
Water System and Water Resource
Current Development Impact Fees**

Meter Size	Water System (1) (2)	Water Resource (1) (2)	Total
5/8 x 3/4	\$5,389.02	\$4,944.71	\$10,333.73
1	8,999.71	8,257.73	17,257.44
1 1/2	17,945.39	16,465.84	34,411.23
2	28,723.43	26,355.26	55,078.69

(1) 5/8 x 3/4 fees apply if 1 inch meter is required for fire sprinkler system.

(2) Multi-Family based on 5/8 x 3/4 fee multiplied by the number of dwelling units and 60%. Meter sizes greater than 2-inches based on projected gallon per day water use divided by 235 gpd or residential equivalent

Methodologies

There are a variety of methods that can serve as a rational basis for computing non-utility and utility development impact fees. The most common include:

- System Buy-In
- Plan-Based Incremental
- Plan Based Average
- Hybrid Method

The **System Buy-in** method uses a historical perspective. The original costs of the system's fixed assets are identified and escalated to current value using a nationally recognized index. System value equals the escalated original cost less developer contributions. The development fee is the quotient of the system equity divided by the system capacity.

The **Plan-Based Incremental** method is a forward-looking and considers only future growth-related capital projects and acquisitions. The development impact fee is the quotient of the growth-related cost of proposed projects for a specified time frame divided by the increase in capacity provided by those projects.

The **Plan-Based Average** method is similar to the **Plan-Based Incremental** method. However, the plan based average approach considers future growth-related projects that benefit new and current development. The development fee is the quotient of the cost of proposed projects for a specified time frame divided by the total capacity served in the calculation year.

The **Hybrid** method combines the **System Buy-in** and **Incremental** methods. The development fee is the quotient of the sum of the current system equity and future growth-related capital costs divided by of the sum of existing system capacity and the increase in capacity provided by the future growth-related projects.

The City evaluated the facilities required to provide necessary public services for new growth detailed in the Final LUA and IIP. In developing the costs in the IIP, the City considered what was needed so the burden of providing services to new development did not lower the service level for existing citizens or charge new development exclusively to increase the level of service provided to existing residents. The City may increase the level of service for current and future residents; however, the development impact fee will reflect only the portion of the facility benefiting new development with funding for the increased level of service portion of the improvement benefiting current development funded by alternative sources.

In all fee categories, projects are based on facility needs to serve future development. There are existing and future facilities that will benefit future development. To recognize the proportion of the costs benefiting development over the study period, project costs allocated to new growth over the study period have been adjusted. Fire and police facilities benefit new development and the fee calculations recognize the proportional cost of current and future facilities benefiting new development. Funding for the portion of facilities benefiting current development will need to be funded from another source which may include current general fund revenues and/or debt summarized in the Fee Report appendices.

Fire and EMS Development Impact Fee

The draft Fire and EMS development impact fees will be assessed City-wide. Table 8 summarizes draft Fire and EMS development impact fees by type of development.

Table 8
Fire and EMS
Draft Development Impact Fees

Category	Persons per Housing Unit	Employees per 1,000 Square Feet	Cost per Service Unit	Calculated Fee	Assessment
Single-Family Residential	1.60		\$199.58	\$319.33	Housing Unit
Multi-Family Residential	1.60		199.58	319.33	Housing Unit
Retail		1.82	199.58	363.53	1,000 square feet
Industrial		1.28	199.58	255.54	1,000 square feet
Office		3.60	199.58	717.91	1,000 square feet
Hotel / Motel		1.09	199.58	217.64	1,000 square feet

Single-family and multi-family residential developments are assessed fees per housing unit while non-residential development categories are assessed per 1,000 square feet of development. Draft fees are proposed to be effective at a date to be determined by City Council and the City will not be able to assess a Fire and EMS development impact fee between August 1, 2014 and the effective date as previously discussed.

The City's Fire and EMS development impact fee was calculated using the hybrid approach that considers:

- Replacement value of constructed and eligible facilities.
- Current cost of future growth-related IIP projects.
- Debt adjustments include;
 - Increase reflecting net present value (NPV) of future interest of growth-related portion of outstanding and projected debt issues.
 - Reduction reflecting NPV of non-growth portion of annual debt service associated with projected debt issues repaid by tax-based revenues.

Table 9 summarizes the calculated Fire and EMS development impact fees per service unit. Service units reflect existing and projected residents and employees detailed in Appendix A of the Final LUA and IIP Report. The capacity of current and planned facilities will be exceeded in FY 2020 and the projected FY 2020 service units are used to calculate a cost per service unit. The cost per service unit is translated into a cost per Equivalent Development Unit (EDU) that varies for different types of development summarized in the Final LUA and IIP Report.

**Table 9
Fire and EMS
Development Impact Fee Calculation**

Category	Year	Service Units	Calculation
Existing Facility Replacement Cost			\$11,274,911
Proposed Facility Costs			4,137,000
Net Present Value of Future Growth-Related Debt Interest			<u>1,716,904</u>
Total			<u>\$17,128,815</u>
Residents	2020	45,678	
Employees	2020	<u>31,462</u>	
Total Service Units		77,140	77,140
Subtotal Cost per Unit			<u>\$222.05</u>
Offset of Future Non-Growth Debt per Service Unit			<u>(\$22.47)</u>
Total Cost per Unit			<u><u>\$199.58</u></u>

The components of the calculated Fire and EMS development impact fee and associated cash flow projection is discussed in the following sections.

Eligible Assets Replacement Value

The replacement value of current eligible Fire and EMS facilities is approximately \$11.3 million as detailed in the Final LUA and IIP Report and summarized in Table 9. The asset value includes existing fire stations, land, specialized vehicles, apparatus, equipment and miscellaneous assets and excludes administrative vehicles.

Infrastructure Improvements Plan Projects

The total cost of three proposed fire stations is \$6.3 million anticipated to be constructed from FY 2015 through FY 2018 as detailed in the Final LUA and IIP Report and summarized in Appendix A. The separate projects are allocated between future development (growth) and current development (non-growth) based on the benefit to future and existing residents and employees. For example, Fire Station 78 is allocated 85% to future development as this station will serve northeastern portion of the City that is primarily undeveloped today with future development projected in the area immediately surrounding from this station receiving the benefit of the facility. The allocation percent for each facility and total costs to new development of approximately \$4.1 million is summarized in Appendix A. Based on the timing of the projects, an annual capital project inflation rate of 3%, compounded annually, is applied to project cost estimates and illustrated in the cash flow and supporting worksheet also provided in Appendix A.

Cash Flow

A cash flow analysis has been compiled to summarize the sources and uses of both Fire and EMS development impact fee fund and the funding of the requirements of current development funded from

general fund revenues. Appendix A details the cash flow analysis. The sections below outline projects and cash flow uses of IIP projects, debt issuance and reserve requirements, debt service funded through development impact fee revenues, interest income, and debt proceeds. For current development, the funding sources incorporate general fund revenues and/or debt instead of development impact fees. This section summarizes the assumptions and projections outlined in Appendix A.

The Fire and EMS development impact fee fund has a fund balance of \$662,699 as of June 30, 2013 available to fund future eligible Fire and EMS facilities.

Debt Proceeds, Issuance Costs and Debt Service

Table 10 summarizes the projected debt and resulting NPV of interest cost future development’s portion of Fire and EMS IIP facilities.

**Table 10
Fire and EMS
Development Impact Fee Fund Debt Issues**

Fiscal Year	Bond Issues	
	Principal	NPV of Interest
FY 2013-14	\$0	\$0
FY 2014-15	0	0
FY 2015-16	200,000	76,308
FY 2016-17	2,100,000	801,224
FY 2017-18	2,200,000	839,371
FY 2018-19	0	0
Total	\$4,500,000	\$1,716,904

Debt projections reflect available funding sources, including existing Fire and EMS development impact fee fund balance, revenues generated from development impact fees balanced against the timing of the project and availability of cash to partially fund anticipated projects.

Debt is also anticipated to fund the current development or non-growth portion of Fire and EMS IIP projects summarized in Appendix A. Table 11 summarizes the projected debt and resulting NPV of principal and interest debt service cost of current development’s portion of Fire and EMS IIP facilities.

**Table 11
Fire and EMS
Development Impact Fee Non-Growth Debt Issues**

Fiscal Year	Bond Issues	
	Principal	NPV of P&I Payments
FY 2013-14	\$0	\$0
FY 2014-15	0	0
FY 2015-16	1,100,000	1,076,317
FY 2016-17	650,000	636,004
FY 2017-18	375,000	366,926
FY 2018-19	0	0
Total	\$2,125,000	\$2,079,247
Total Service Unit		92,534
Offset per Service Unit		\$22.47

Assumptions regarding the term, interest rate, debt service requirement and issuance expenses are also summarized in Appendix A.

A consideration in implementing draft Fire and EMS development impact fees is the availability of funding for current development’s portion of Fire and EMS IIP facilities as well as the operating costs of the facilities once constructed.

NPV of Future Growth-Related Debt Interest

The NPV of future interest payments associated with future development’s portion of debt funded Fire and EMS IIP facilities is projected to be approximately \$1.7 million. The NPV interest reflects today’s value associated with funding the growth-related facilities and is eligible for inclusion as assessed development impact fees are anticipated to repay the growth-related debt service. The annual debt service and NPV associated with projected debt issues are detailed in Appendix A.

Offsets

Debt projected to fund current development’s portion of Fire and EMS IIP facilities generate offsets or reductions to the draft fee since future general fund revenues generated from taxes assessed to current and future development will be used to repay current development’s portion of the issued General Obligation (GO) debt. The offset is calculated based on the NPV of future principal and interest payments of approximately \$2.1 million divided by the projected Fire and EMS service units (residents and employees) at FY 2030. The annual debt service and NPV associated with projected debt issues are detailed in Appendix A.

Revenue Projections

Projected Fire and EMS development impact fee revenues are based on the draft fee by development type, indexed for inflation, applied to projected development for the following development types:

- Single-family residential
- Multi-family residential
- Retail
- Industrial
- Office
- Hotel / Motel

Residential developments are assessed fees per housing unit while non-residential development categories are assessed per 1,000 square feet of development.

Police Development Impact Fee

The draft Police development impact fees will be assessed City-wide. Table 12 summarizes draft Police development impact fees by type of development.

Table 12
Police
Draft Development Impact Fees

Category	Persons per Housing Unit	Employees per 1,000 Square Feet	Cost per Service Unit	Calculated Fee	Assessment
Single-Family Residential	1.60		\$71.11	\$113.78	Housing Unit
Multi-Family Residential	1.60		71.11	113.78	Housing Unit
Retail		1.82	71.11	129.53	1,000 square feet
Industrial		1.28	71.11	91.06	1,000 square feet
Office		3.60	71.11	255.81	1,000 square feet
Hotel / Motel		1.09	71.11	77.55	1,000 square feet

Single-family and multi-family residential developments are assessed fees per housing unit while non-residential development categories are assessed per 1,000 square feet of development. Draft fees are proposed to be effective at a date to be determined by City Council and the City will not be able to assess a Police development impact fee between August 1, 2014 and the effective date as previously discussed.

The City's Police development impact fee was calculated using the hybrid approach that considers:

- Replacement value of constructed and eligible facilities.
- Current cost of future growth-related IIP projects.
- Debt adjustments include;
 - Increase reflecting NPV of future interest of growth-related portion of projected debt issues.
 - Reduction reflecting NPV of non-growth portion of annual debt service associated with projected debt issues repaid by tax-based revenues.

Table 13 summarizes the calculated Police development impact fees per service unit. Service units reflect existing and projected residents and employees detailed in Appendix A of the Final LUA and IIP Report. The capacity of current and planned facilities will be exceeded in FY 2030 and the projected FY 2030 service units are used to calculate a cost per service unit. The cost per service unit is translated into a cost per EDU that varies for different types of development previously discussed in the Final LUA and IIP Report.

Table 13
Police
Development Impact Fee Calculation

Category	Year	Service Units	Calculation
Existing Facility Replacement Cost			\$6,053,433
Capital Project Growth-Related Facility Costs			1,715,964
Net Present Value of Future Growth-Related Debt Interest			<u>572,304</u>
Total			<u>\$8,341,701</u>
Residents	2030	52,512	
Employees	2030	<u>40,022</u>	
Total Service Units		92,534	92,534
Subtotal Cost per Unit			<u>\$90.15</u>
Offset of Future Non-Growth Debt per Service Unit			<u>(\$19.03)</u>
Total Cost per Unit			<u><u>\$71.11</u></u>

The components of the calculated Police development impact fee and associated cash flow projection is discussed in the following sections.

Eligible Assets Replacement Value

The replacement value of current eligible Police facilities is approximately \$6.1 million as detailed in the Final LUA and IIP Report and summarized in Table 13. The asset value includes the existing police headquarters and land and excludes vehicles, regional communication center, communications and equipment and other miscellaneous assets.

Infrastructure Improvements Plan Projects

The total cost of proposed police headquarter expansion is \$3.7 million anticipated to be constructed from FY 2014 through FY 2015 as detailed in the Final LUA and IIP Report and summarized in Appendix B. The project components are allocated between future development (growth) and current development (non-growth) based on the benefit to future and existing residents and employees. For example, the proposed police station headquarter facility includes office, parking and shooting range components that were reviewed with City staff to allocate the overall facility costs among future and current development. The allocation percent for each facility component and total costs to new development of approximately \$1.7 million is summarized in Appendix B. Based on the timing of the

projects, an annual capital project inflation rate of 3%, compounded annually, is applied to project cost estimates and illustrated in the cash flow and supporting worksheet also provided in Appendix B.

Cash Flow

A cash flow analysis has been compiled to summarize the sources and uses of both Police development impact fee fund and the funding of the requirements of current development funded from general fund revenues. Appendix B details the cash flow analysis. The sections below outline projects and cash flow uses of IIP projects, debt issuance and reserve requirements, debt service funded through development impact fee revenues, interest income, and debt proceeds. For current development, the funding sources exclude development impact fees and instead incorporate general fund revenues. This section summarizes the assumptions and projections outlined in Appendix B.

The Police development impact fee fund has a fund balance of \$707,724 as of June 30, 2013 available to fund future eligible Police facilities.

Debt Proceeds, Issuance Costs and Debt Service

Table 14 summarizes the projected debt and resulting NPV of interest cost future development’s portion of Police IIP facilities. Debt projections reflect available funding sources, including existing Police development impact fee fund balance, revenues generated from development impact fees balanced against the timing of the project and availability of cash to partially fund anticipated projects.

Table 14
Police
Development Impact Fee Fund Debt Issues

Fiscal Year	Bond Issues	
	Principal	NPV of Interest
FY 2013-14	\$0	\$0
FY 2014-15	1,500,000	572,304
FY 2015-16	0	0
FY 2016-17	0	0
FY 2017-18	0	0
FY 2018-19	0	0
Total	<u>\$1,500,000</u>	<u>\$572,304</u>

Debt is also anticipated to fund the current development or non-growth portion of Police IIP projects summarized in Appendix B. Table 15 summarizes the projected debt and resulting NPV of principal and interest debt service cost of current development’s portion of Police IIP facilities. Assumptions regarding the term, interest rate, debt service requirement and issuance expenses are also summarized in Appendix B.

**Table 15
Police
Development Impact Fee Non-Growth Debt Issues**

Fiscal Year	Bond Issues	
	Principal	NPV of P&I Payments
FY 2013-14	\$0	\$0
FY 2014-15	1,800,000	1,761,243
FY 2015-16	0	0
FY 2016-17	0	0
FY 2017-18	0	0
FY 2018-19	0	0
Total	\$1,800,000	\$1,761,243
Total Service Unit		92,534
Offset per Service Unit		\$19.03

A consideration in implementing draft Police development impact fees is the availability of funding for current development’s portion of Police IIP facilities as well as the operating costs of the facilities once constructed.

NPV of Future Growth-Related Debt Interest

The NPV of future interest payments associated with future development’s portion of debt funded Police IIP facilities is projected to be approximately \$0.6 million. The NPV interest reflects today’s value associated with funding the growth-related facilities and is eligible for inclusion as assessed development impact fees are anticipated to repay the growth-related debt service. The annual debt service and NPV associated with projected debt issues are detailed in Appendix B.

Offsets

Debt projected to fund current development’s portion of Police IIP facilities generate offsets or reductions to the draft fee since future general fund revenues generated from taxes assessed to current and future development will be used to repay current development’s portion of the issued GO debt. The offset is calculated based on the NPV of future principal and interest payments of approximately \$1.8 million divided by the projected Police service units (residents and employees) at FY 2030. The annual debt service and NPV associated with projected debt issues are detailed in Appendix B.

Revenue Projections

Projected Police development impact fee revenues are based on the draft fee by development type, indexed for inflation, applied to projected development for the following development types:

- Single-family residential
- Multi-family residential
- Retail

- Industrial
- Office
- Hotel / Motel

Residential developments are assessed fees per housing unit while non-residential development categories are assessed per 1,000 square feet of development.

Water System Development Impact Fee

The draft Water System development impact fees will be assessed within ten separate service areas. The draft fees were calculated for each service area and development within individual service areas may include more than one service area and the combined fee will be assessed. Table 16 summarizes draft 5/8-inch by 3/4-inch water system development impact fees and combined fees assessed to new development by service area.

Table 16
Water System
Draft Development Impact Fees

Water Service	Service Area	Total Fee (5/8" x 3/4")	
Area	Fee (5/8" x 3/4")	By Service Area	Areas Included
A	\$827	\$827	A
B	1,436	2,263	A+B
C	126	2,389	A+B+C
D	69	2,332	A+B+D
E	18	4,090	A+B+C+I+J+E
F	345	2,734	A+B+C+F
G	362	3,595	A+B+C+I+G
H	1,072	3,461	A+B+C+H
I	844	3,233	A+B+C+I
J	839	4,072	A+B+C+I+J

Water System development impact fees are assessed by meter size and increased for 3/4-inch and higher meter sizes based on the AWWA meter capacity relationships. The fee schedules for each meter size by service area are provided in Appendix C. Draft fees are proposed to be effective August 1, 2014.

The Water development impact fees for each service area were calculated using the hybrid approach that considers:

- Replacement value of constructed and eligible back-bone water facilities.
- Current cost of future growth-related IIP projects.
- Debt adjustments include;
 - Increase reflecting NPV of remaining interest of growth-related portion of outstanding and projected debt issues.

- Reduction reflecting non-growth portion of remaining principal associated with outstanding debt issues repaid by water user charges.

Appendix C details the calculated Water System development impact fees per service unit for each service area. Water System development impact fees reflect two separate unit cost calculations; water system excluding storage facilities and storage facilities. Service units reflect existing and projected well capacity in millions of gallons per day (MGD) for water system facilities excluding storage assets and existing and planned storage capacity in MGD for water system storage facilities as detailed in the Final LUA and IIP Report. The cost per service unit (MGD) is translated into a cost per 5/8-inch by 3/4-inch water meter or EDU based on the peak day water use per EDU. Water facilities are designed to meet the demands of peak day water use and this use influences the necessary capacity.

The components of the calculated Water System development impact fee and associated cash flow projection is discussed in the following sections.

Eligible Assets Replacement Value

The replacement value of eligible Water System facilities is approximately \$95.4 million as detailed in the Final LUA and IIP Report. The asset value includes existing water supply, treatment, distribution and storage. The asset value excludes minor miscellaneous improvements or older facilities as well as distribution and transmission facilities constructed by developers and dedicated to the City excluded as similar facilities will be required to be constructed and dedicated to the City.

Outstanding Debt

The City has multiple outstanding debt issues and debt service repaid through a combination of water rates and/or development impact fees as detailed in Appendix C.

Net Present Value of Future Interest Payments

The NPV of future interest payments associated with future development's portion of debt funded Water System facilities is approximately \$1.2 million for water system facilities and \$1.1 million for water storage facilities. These amounts exclude the portion of the same debt issues repaid by user charges. The NPV interest reflects today's value associated with funding the growth-related facilities and is eligible for inclusion as assessed development impact fees are anticipated to repay the growth-related debt service.

Future Principal Payments

The total of future principal associated with current development's portion of debt funded water facilities is approximately \$9.6 million for water system facilities and \$6.0 million for water storage facilities. These are detailed in the Appendix C and exclude the portion of the same debt issues repaid by water system development impact fees. The outstanding principal financed facilities constructed with capacity to serve current and future water customers. The reduction of these costs against the eligible assets is a conservative approach to reduce the calculated development impact fee as future water rates will be used to retire the outstanding principal.

Infrastructure Improvements Plan Projects

The total cost of planned IIP eligible facilities over the six-year planning period from FY 2014 through FY 2019 is detailed in the Final LUA and IIP and summarized in Appendix C. Projects are comprised on treatment, distribution and storage facility and allocated among current and future development by service area as detailed in the water distribution model update and capital project review completed by the City. Appendix C details the projects by service area. The City has identified operating or “O” capital projects that are operational in nature and funded fully through annual user charges. Based on the timing of the projects, an annual capital project inflation rate of 3%, compounded annually, is applied to project cost estimates and illustrated in the cash flow and supporting worksheet provided in Appendix C.

Cash Flow

A cash flow analysis has been compiled for each service area that summarizes the sources and uses of Water System development impact fee funds. A cash flow analysis was also prepared for other non-growth related capital and special purpose subfunds and the funding of the requirements of current development funded from water user charges. Appendix C summarizes the results of the cash flow. The sections below outline projects and cash flow uses of IIP projects, debt issuance and reserve requirements, debt service funded through development impact fee revenues, interest income, and debt proceeds. For current development, the funding sources exclude development impact fees and instead incorporate water rates. This section summarizes the assumptions and projections outlined in Appendix C.

The Water System development impact fee fund has a fund balance of (\$48,405) as of June 30, 2013 available to fund future eligible Water System facilities⁸.

Debt Proceeds, Issuance Costs and Debt Service

Debt by fiscal year reflects the following assumptions:

- 100% debt funding of eligible IIP facilities in FY 2015-16 and FY 2016-17
- Debt funding of capital projects 90W and 92W in FY 2017-18 and FY 2018-19.⁹
- Assumptions regarding the term, interest rate, debt service requirement and issuance expenses are summarized in Appendix C.

Table 17 summarizes the projected debt and resulting NPV of interest cost future development’s portion of Water System IIP facilities.

⁸ The fund balance reported in the development fee fund annual report was adjusted for Water Infrastructure Financing Authority of the State of Arizona on-going loan reimbursements where costs were submitted for reimbursement prior to the end of the fiscal year with reimbursements pending.

⁹ Project 90 W is the Chino Valley Booster Facility Upgrades while project 92 W includes three projects of Intermediate Booster Pump Station and Intermediate Storage Reservoir Phase 1.

Table 17
Water System
Development Impact Fee Fund Debt Issues

Fiscal Year	Principal
FY 2013-14	\$0
FY 2014-15	0
FY 2015-16	2,800,000
FY 2016-17	3,500,000
FY 2017-18	3,900,000
FY 2018-19	4,000,000
Total	\$14,200,000

Debt is also anticipated to fund the current development or non-growth portion of some of the Water System IIP projects summarized in Appendix C. Assumptions regarding the term, interest rate, debt service requirement and issuance expenses are also summarized in Appendix C.

NPV of Future Growth-Related Debt Interest

The NPV of future interest payments associated with future development’s portion of debt funded Water System IIP facilities is projected to be approximately \$3.8 million for water system facilities and \$1.6 million for storage facilities. The debt issues are further segmented by service area based on the percent of completed facilities within a service area to the percent of debt funded in a given year. The NPV interest reflects today’s value associated with funding the growth-related facilities and is eligible for inclusion as assessed development impact fees are anticipated to repay the growth-related debt service. The annual debt service and NPV associated with projected debt issues are detailed in Appendix C.

Revenue Projections

Projected Water System development impact fee revenues are based on the draft fee per EDU by service area, indexed for inflation, applied to projected EDUs over the six-year period. Draft fees are proposed to be effective August 1, 2014 or one month into the fiscal year. Revenues are retained within the service area. FY 2013-14 revenues are included in the Total Water System Impact Fee Subfund with distributions to various service area based facilities and/or to repay debt service.

Current EDU distribution by service area was identified by the City during the water distribution model analysis. EDUs are projected in one of ten service areas as summarized in Appendix C. Service areas A and B reflect the entire water system with projected EDUs by corresponding year based on the average growth rate estimated in the Final LUA and IIP. Service Areas C through J are separate areas of the City with some service areas inside of each other. For example, Service Area J is a component of Service Areas A, B, C and I and new EDUs within Service Area J will also be included in projected EDUs in larger service areas. The distribution of EDUs among the various service areas was estimated evaluating the current distribution of development and anticipated areas of the City to develop. The water model update also contemplated the pace of development as infrastructure water identified in prioritizing capital projects for inclusion the master plan and IIP.

Loans From Operations

Within each service area the uses of funds may not directly match projected growth and timing of new development. Facilities are allocated to current and future development based on the build-out estimates of the overall service areas as outlined within the Final LUA and IIP. Debt is anticipated to be issued to fund a portion of the upfront costs also previously discussed. The timing of the facility requirements as well as current and future debt service may create cash shortfalls which are met by loans from the operating funds. These loans are repaid as development impact fee revenue exceeds annual expenditure requirements, but in cases of smaller service areas or areas slower to develop, loans may be incurred for some time.

Water Resource Development Impact Fee

The draft Water Resource development impact fees will be assessed within water service area A or City-wide. Table 18 summarizes draft 5/8-inch by 3/4-inch Water Resource development impact fee.

Table 18
Water Resource
Development Impact Fee

Water Resource Service Area	Service Area Fee (5/8" x 3/4")	Total Fee (5/8" x 3/4") By Service Area
A	\$1,481	\$1,481

Water Resource development impact fees are assessed by meter size and increased for 3/4-inch and higher meter sizes based on the AWWA meter capacity relationships. The fee schedules for each meter size by service area are provided in Appendix D. Draft fees are proposed to be effective August 1, 2014.

The Water Resource development impact fee was calculated using the buy-in approach that considers:

- Replacement value of constructed and eligible Big Chino Water Ranch (BCWR) facilities.
- Debt adjustments include;
 - Increase reflecting NPV of remaining interest of growth-related portion of outstanding and projected debt issues.
 - Reduction reflecting non-growth portion of remaining principal associated with outstanding debt issues repaid by water user charges.

Appendix D details the calculated Water Resource development impact fee per service unit that reflect the unit cost of capacity of the BCWR debt funded acquisition.

Water Resource development impact fee reflects the unit cost of capacity of the City's portion of the BCWR 2004 acquisition. The cost per service unit (MGD) is translated into a cost per 5/8-inch by 3/4-inch water meter or EDU based on the peak month water use per EDU.

The components of the calculated Water Resource development impact fee and associated cash flow projection is discussed in the following sections.

Eligible Assets Replacement Value

The replacement value of the City's portion of the BCWR is approximately \$12.4 million as detailed in the Final LUA and IIP Report. The asset value includes the initial 2004 acquisition.

Outstanding Debt

The City incurred a 2004 debt issue repaid through a combination of the alternative water fee and development impact fees as detailed in Appendix D.

Net Present Value of Future Interest Payments

The NPV of future interest payments associated with City's portion of the 2004 debt issue is approximately \$3.6 million. This amount excludes the portion of the same debt issues repaid by user charges. The NPV interest reflects today's value current value associated with funding the growth-related facilities and is eligible for inclusion as assessed development impact fees are anticipated to repay the growth-related debt service.

Future Principal Payments

The total of future principal associated with the alternative water fund's portion of the 2004 debt issue is approximately \$2.1 million. This amount excludes the portion of the same debt issues repaid by Water Resource development impact fees. The reduction of these costs against the eligible assets is a conservative approach to reduce the calculated development impact fee as future water rates will be used to retire the outstanding principal.

Infrastructure Improvements Plan Projects

The City incurred additional expenditures after the 2004 BCWR acquisition related to right-of-way acquisition, engineering, and legal costs that have been funded in part by water resource development impact fees. The City anticipates additional costs including monitoring and modeling outlined within the Comprehensive Agreement No. 1. Additional BCWR capital costs beyond the FY 2019 IIP planning period have been excluded; these costs include those to construct a pipeline as well as additional infrastructure necessary to transport water from the BCWR to City water customers. For this reason, BWCR right-of-way acquisition, engineering and legal costs incurred costs after 2004 and future cash funded capital expenditures related to the BCWR Project have been excluded from the water resource development impact fee and will need to be funded by City water user charges until the BCWR Project is included in the City's IIP. As the IIP is updated, the City may update the water resource development impact fee to recover additional planned and incurred improvements. The draft water resource development impact fee is restricted to the 2004 BCWR debt funded acquisition with revenues used to repay the growth-related portion of the same 2004 debt issue.

Cash Flow

A cash flow analysis has been compiled for the Water Resource development impact fee that summarizes the sources and uses of the subfund. A cash flow analysis was also prepared for other non-growth related capital and special purpose subfunds and the funding of the requirements of current development funded from water user charges. Appendix D summarizes the results of the cash flow. The sections below outline debt service payments funded through development impact fee revenues,

transfers from the alternative water subfund and interest income. This section summarizes the assumptions and projections outlined in Appendix D.

The Wastewater System development impact fee fund has a fund balance of \$22,508 as of June 30, 2013 available to fund BCWR debt service.

Revenue Projections

Projected Water Resource development impact fee revenues are based on the draft fee per EDU by service area, indexed for inflation, applied to projected EDUs over the six-year period. Draft fees are proposed to be effective August 1, 2014 or one month into the fiscal year and retained within the subfund. FY 2013-14 revenues are included based on the current Water Resource development impact fee. Projected EDUs are based on water service area A as previously discussed.

Wastewater System Development Impact Fee

The draft Wastewater System development impact fees will be assessed within nine separate service areas. The draft fees were calculated for each service area and development within individual service areas may include more than one service area and the combined fee will be assessed. Current fees are assessed per fixture unit. Table 19 summarizes draft 5/8-inch by 3/4-inch wastewater system development impact fees and combined fees assessed to new development by service area.

Table 19
Wastewater System
Draft Development Impact Fees

Wastewater Service Area	Service Area Fee (5/8" x 3/4")	Total Fee (5/8" x 3/4")	
		By Service Area	Areas Included
A	\$193	\$193	A
B	3,132	3,325	A+B
C	168	2,156	A+C+I
D	67	2,055	A+D+I
E	0	3,325	A+B+E
F	83	3,407	A+B+F
G	238	3,562	A+B+G
H	37	3,361	A+B+H
I	1,796	1,989	A+I

Wastewater System development impact fees are assessed by meter size and increased for 3/4-inch and higher meter sizes based on the AWWA meter capacity relationships. The fee schedules for each meter size by service area are provided in Appendix E. Draft fees are proposed to be effective August 1, 2014.

The Wastewater System development impact fees for each service area were calculated using the hybrid approach that considers:

- Replacement value of constructed and eligible back-bone wastewater facilities.
- Current cost of future growth-related IIP projects.

- Debt adjustments include;
 - Increase reflecting NPV of remaining interest of growth-related portion of outstanding and projected debt issues.
 - Reduction reflecting non-growth portion of remaining principal associated with outstanding debt issues repaid by water user charges.

Appendix E details the calculated Wastewater System development impact fees per service unit for each service area. Wastewater System development impact fees reflect the unit cost of capacity of the current and future treatment capacity in MGD of the City's Sundog and Airport WRFs. The cost per service unit (MGD) is translated into a cost per 5/8-inch by 3/4-inch water meter or EDU based on the peak month wastewater use per EDU. Wastewater facilities are designed to meet the demands of peak season wastewater influent and this use influences the necessary capacity.

The components of the calculated Wastewater System development impact fee and associated cash flow projection is discussed in the following sections.

Eligible Assets Replacement Value

The replacement value of eligible Wastewater System facilities is approximately \$112.4 million as detailed in the Final LUA and IIP Report. The asset value includes existing sewer lines, lift stations, treatment, administrative and other miscellaneous assets. The asset value excludes minor miscellaneous improvements or older facilities, as well as collection facilities constructed by developers and dedicated to the City as similar facilities will be required to be constructed and dedicated to the City.

Outstanding Debt

The City has multiple outstanding debt issues and debt service repaid through a combination of wastewater rates and/or development impact fees as detailed in Appendix E.

Net Present Value of Future Interest Payments

The NPV of future interest payments associated with future development's portion of debt funded Wastewater System facilities is approximately \$8.3 million. These amounts exclude the portion of the same debt issues repaid by user charges. The NPV interest reflects today's value current value associated with funding the growth-related facilities and is eligible for inclusion as assessed development impact fees are anticipated to repay the growth-related debt service.

Future Principal Payments

The total of future principal associated with current development's portion of debt funded Wastewater System facilities is approximately \$19.4 million. These amounts exclude the portion of the same debt issues repaid by Wastewater System development impact fees. The outstanding principal financed facilities constructed with capacity to serve current and future wastewater customers. The reduction of these costs against the eligible assets is a conservative approach to reduce the calculated development impact fee as future wastewater rates will be used to retire the outstanding principal.

Infrastructure Improvements Plan Projects

The total cost of planned IIP eligible facilities over the six-year planning period from FY 2014 through FY 2019 is detailed in the Final LUA and IIP and summarized Appendix E¹⁰. Projects are comprised on treatment and collection system facilities and allocated among current and future development by service area as detailed in the wastewater collection model update and capital project review completed by the City. Appendix E details the projects by service area. The City has identified operating or “O” capital projects that are operational in nature and funded through annual user charges. Based on the timing of the projects, an annual capital project inflation rate of 3%, compounded annually, is applied to project cost estimates and illustrated in the cash flow and supporting worksheet provided in Appendix E.

Cash Flow

A cash flow analysis has been compiled for each service area that summarizes the sources and uses of Wastewater System development impact fee subfunds. A cash flow analysis was also prepared for other non-growth related capital and special purpose subfunds and the funding of the requirements of current development funded from wastewater user charges. Appendix E summarizes the results of the cash flow. The sections below outline projects and cash flow uses of IIP projects, operating subfund loan repayments, debt issuance, and reserve requirements, debt service funded through development impact fee revenues, operating subfund loans, interest income, and debt proceeds. For current development, the funding sources exclude development impact fees and instead incorporate wastewater rates. This section summarizes the assumptions and projections outlined in Appendix E.

The Wastewater System development impact fee fund has a fund balance of (\$118,561) as of June 30, 2013 available to fund future eligible Wastewater System facilities¹¹.

Debt Proceeds, Issuance Costs and Debt Service

Debt by fiscal year reflects 100% debt funding of eligible IIP facilities in FY 2015-16 through FY 2018-19.

Table 20 summarizes the projected debt of future development’s portion of Wastewater System IIP facilities.

¹⁰ Project 24 WW, Upsize Sewer on Prescott Lakes Parkway North of State Route 89 in FY 2013-14 totaling \$490,000 in wastewater service area F, was removed from the wastewater projects in the Final LUA and IIP after adoption. The project was excluded from the draft and final wastewater development impact fee for service area F and Appendix E.

¹¹ The fund balance reported in the development fee fund annual report was adjusted for Water Infrastructure Financing Authority of the State of Arizona on-going loan reimbursements where costs were submitted for reimbursement prior to the end of the fiscal year with reimbursements pending.

Table 20
Wastewater System
Development Impact Fee Fund Debt Issues

Fiscal Year	Principal
FY 2013-14	\$0
FY 2014-15	1,300,000
FY 2015-16	1,700,000
FY 2016-17	3,400,000
FY 2017-18	500,000
FY 2018-19	2,700,000
Total	\$9,600,000

Debt is also anticipated to fund the current development or non-growth portion of the same Wastewater System IIP projects summarized in Appendix E. Assumptions regarding the term, interest rate, debt service requirement and issuance expenses are also summarized in Appendix E.

NPV of Future Growth-Related Debt Interest

The NPV of future interest payments associated with future development’s portion of debt funded Wastewater System IIP facilities is projected to be approximately \$3.6 million. The debt issues are further segmented by service area based on the percent of completed facilities within a service area to the percent of debt funded in a given year. The NPV interest reflects today’s value associated with funding the growth-related facilities and is eligible for inclusion as assessed development impact fees are anticipated to repay the growth-related debt service. The annual debt service and NPV associated with projected debt issues are detailed in Appendix E.

Revenue Projections

Projected Water System development impact fee revenues are based on the draft fee per EDU by service area, indexed for inflation, applied to projected EDUs over the six-year period. Draft fees are proposed to be effective August 1, 2014 or one month into the fiscal year. Revenues are retained within the service area. FY 2013-14 revenues are included in the Total Wastewater System Impact Fee Subfund with distributions to various service area based facilities and/or to repay debt service.

Current EDU distribution by service area was identified by the City during the sewer collection model analysis. EDUs are projected in one of nine service areas as summarized in Appendix E. Service area A reflects the entire wastewater system with projected EDUs by year corresponding based on the average growth rate estimated in the Final LUA and IIP. Service Areas B through J are separate areas of the City with some service areas inside of each other as previously discussed for water EDUs. The distribution of EDUs among the various service areas was estimated evaluating the current distribution of development and anticipated areas of the City to develop. The wastewater model update also contemplated the pace of development affecting infrastructure identified in prioritizing capital projects for inclusion the master plan and IIP.

Loans From Operations

Within each service area the uses of funds may not directly match projected growth and timing of new development. Facilities are allocated to current and future development based on the build-out estimates of the overall service areas as outlined within the Final LUA and IIP. Debt is anticipated to be issued to fund a portion of the upfront costs also previously discussed. The timing of the facility requirements as well as current and future debt service may create cash shortfalls which are met from loans from the operating funds. These loans are repaid as development impact fee revenue exceeds annual expenditure requirements, but in cases of smaller service areas or areas slower to develop, loans may be incurred for some time.
