

# FY24 Micro Seal Preservation Project

## Willow Creek Road

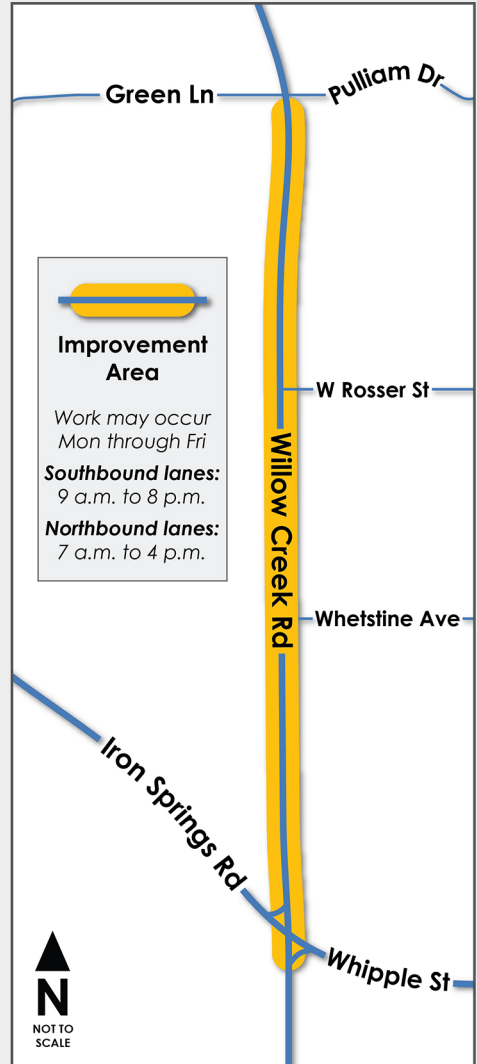

The City of Prescott and their contractor, Southwest Slurry Seal, are set to begin the FY24 Micro Seal Preservation Project the week of March 18, 2024. The project consists of micro milling, crack sealing and applying a micro seal treatment to the asphalt pavement along Willow Creek Road, from Green Lane/Pulliam Drive to just south of Iron Springs Road/Whipple Street (including the independent turn lanes). Please note that this is a fast-moving project, with the anticipated completion at the end of April 2024.

A detailed notification door hanger will be delivered to those directly affected prior to micro seal operations commencing in a given area. The notifications will include information regarding access, work hours and traffic impacts related to these operations. Once complete, these improvements will extend pavement life and improve the road quality for Prescott motorists. The City is dedicated to keeping the traveling public, businesses and residents informed of potential construction impacts throughout the project.

*One lane of traffic will always be open in each direction, however, please be aware of lane closures, temporary driveway closures, reduced speeds, rough road conditions, loud noise and flagging operations throughout the work zones. Access to driveway entrances along Willow Creek Road could be restricted for up to 15 minutes to allow the pavement surface treatment to properly dry. These restrictions will be coordinated on an individual basis with those affected. Motorists should expect delays and allow for extra time when traveling through the project corridor.*

## **FY24 Micro Seal Preservation Project**

*Scheduled to begin  
the week of March 18, 2024*

---

**Do not drive on the fresh  
surface treatment. Please wait  
until crews have moved all  
equipment and signage.**
