

# UTILITY PROJECT

## Zone 41 (Mingus) Pump Station, Tank, and Pipeline

***MARCH 1, 2024***

The project generally consists of replacing two existing 200,000 gallon water storage tanks with a single 750,000 gallon water storage tank. The project includes replacing the existing Mingus Pump Station to meet demands and upsize the pipeline between the pump station and the new tank.

The engineering services contract was awarded to Brown and Caldwell. Design and utility investigation is complete. The plans are currently in the building permit review cycle. The project is scheduled to start construction in summer 2024.
