Wildwood Lift Station Abandonment

April 2024

UTILITY PROJECT

The project will replace an old, outdated lift station, which is located behind properties along Highland Terrace (within the Wildwood Estates Subdivision). Due to its location, the lift station is very difficult to access and maintain. The city is planning to abandon the lift station and reroute sewer lines to a proposed new gravity sewer main extending from Wildwood Drive.

The City is coordinating with an engineer and residents on a proposed new gravity sanitary sewer main to replace the existing lift station.

The engineer shall provide options where a gravity sewer main is feasible this spring before design drawings are finalized mid-year. The City anticipates that the project will require temporary construction and permanent easements. Construction is tentatively scheduled to start in late summer.
