## North Washington Sidewalk Repairs

May 2024

### **ROADWAY PROJECT**

The project generally includes the replacement of sidewalks along N. Washington Avenue, from E. Willis to E. Sheldon Street, as well as Pine Street. The replacement of driveways as needed will be determined in the field at the direction of the City. The trees between the sidewalk and the curb have contributed to the deterioration of the sidewalk and other critical infrastructure. Seventeen trees will be removed, and five existing stumps will be ground below dirt grade.

Construction was successfully completed on 4/10/2024.
