## **Zone 56 1.5mg Water Tank and Piping Project**

May 2024

### **UTILITY PROJECT**

The Zone 56 Tank and Piping Project generally consists of constructing a new partially buried 1.5-million-gallon pre-stressed concrete tank to be located north of Highway 69, west of York Motors. The tank will replace the existing 100,000-gallon steel tank located in Prescott Canyon Estates. The project also includes removing and replacing approximately 4,300 lineal feet of existing 8-inch CIP water line with a new 16-inch DIP water line.

Fann Contracting, Inc., was awarded the construction contract for this project. Installation of the 16-inch water main and the water tank is complete; work on the Zone 7 Booster Pump Station continues.
