**Section 7. Security/Public Safety Information:** As an event organizer, you are required to provide a safe and secure environment for your event through sound preparation and by anticipating potential concerns. The City of Prescott Police Department has the final authority to determine your event security requirements. The City of Prescott Fire Department has final authority on fire code enforcement, fire lane integrity and medical standby requirements. For many events you will be required to pay off-duty officers to provide needed security. The Prescott Police Department will determine which events will require off-duty officers and the number of officers at each event. Contact the Prescott Police Department Patrol Secretary at (928)777-1940 for costs and requirements associated with hiring off-duty law enforcement personnel. Arizona law requires that the security company and security personnel be licensed through the Arizona Department of Public Safety. This license requirement does not apply to in-house security or volunteers provided by the business or organization hosting the event. For additional information regarding private security company licensing, contact the Arizona Department of Public Safety at (602)223-2361.

**Closure of Public Access:** Any business that may be affected by possible street/parking closure must be notified prior to submittal of application. Please include the business name, contact name and phone number of each business contacted, with approval/disapproval with this application signature form. Once the application is approved, it is the responsibility of the event organizer to notify businesses of approval. The Special Events Committee recommends providing a copy of the application and/or approval permit. Street closures require 75% approval from **ALL** businesses on requested street(s) to be closed.

**Traffic Control Plan Overview:** A Traffic Control Plan is used to indicate vehicle/pedestrian traffic control, detour routes, directional signs, barricades, and street closures for your event. The applicant is responsible for providing all required barricades and traffic control signs **at no cost to the City**. Barricades must be set up by a licensed and bonded traffic control company. All No Parking Barricades **must** be in place no later than 4:00PM the day before your expected closure. Prescott Regional Communication Center (PRCC) shall be contacted at (928)445-3131 to confirm that barricades are set. Applicants failing to contact PRCC or setting barricades later than listed could be held liable for tow bills. A Traffic Control Plan must be submitted for the proposed closure of any street, sidewalk, alley, right-of-way, parking lot or similar public access area. Include/indicate the proposed parade/race route, if applicable. **\*Event structures (EZ-Ups, tents, fencing, etc) must be at least ten (10) feet away from traffic control barricades.** Traffic Control Plans must comply with the **current Manual on Uniform Traffic Control Devices** and be approved by the City Traffic Engineer. ### Guidelines for Special Events

The Prescott Fire Department (PFD) is pleased to be able to assist you in planning your special event. These events contribute to the community spirit and well-being of our city. We would like to help you plan a safe and memorable event by providing the following guidelines which are referenced in the 2018 International Fire Code (IFC) as adopted by the City of Prescott. The protection of life and property is our overriding objective. All special events as enumerated in the City of Prescott Special Events Policies and Procedures document or an outdoor assembly event where planned attendance exceeds 1000 persons (IFC 105.6.36) require a permit issued by PFD. Prior to the event a meeting with the Special Events Committee will be scheduled. This meeting is to assist you in planning your event and coordinating your needs with various city departments (Police, Fire, Streets, Solid Waste, etc.) In the case of more complex events, additional follow-up coordination meetings may be required. The more information we have regarding your event, the better we can help you plan a successful event. The following items are for reference only and should assist you in your logistics. An inspection of your event venue will be conducted by a fire official prior to the commencement of your event (IFC 3106.2.1). The following list of items is not all-encompassing but covers the most common issues. Any deficiencies noted at the time of inspection will be required to be corrected prior to the event commencing.

#### Food Vendors

A separate addendum is attached to this sheet that lists the requirements for mobile food units (MFU). MFU's are defined as "food trucks" or "trailers" and are required to have been inspected by a fire official of any Arizona fire jurisdiction within the past year as well as the Yavapai County Department of Health Services. If MFU's cannot produce a current fire inspection report they will be subject to inspection by PFD fire officials prior to commencement of the event. Should the MFU be found to not be in compliance with applicable IFC provisions and Title 9 of the Arizona Revised Statutes Section 485 et seq. relative to municipal regulation of MFU's, the business owner will be informed and that unit will not be permitted to operate at the event. In the interest of public safety, the MFU will be required to be removed from the event venue. It is highly recommended that if an MFU has not received a fire inspection (not to be confused with fire protection equipment service by the vendor's fire protection equipment service provider) in previous 12 months, that a fire inspection be completed prior to arrival at the event. The required fire inspection may be completed by any Arizona fire authority or past fire department.

Other cooking operations (such open-air or under an EZ-Up):

- Any cover or canopy must be flame-resistant. (IFC 3107.12.4).
- A Class K fire extinguisher must be available for any cooking utilizing cooking oils/grease as well as a non-combustible lid of sufficient size to cover the cooking well. Cooking equipment shall be placed on a non-combustible surface. (IFC 3106.5.2).
- Class ABC fire extinguisher to be provided if internal combustion engines (generators) are utilized. (IFC 3107.9).

#### Tents

The following are applicable to tents, canopies and membrane structures (such as bounce houses).

- Tents over 400 square feet and canopies over 700 square feet require separate permits in addition to your special events permit. If at least one side of the structure is enclosed it is considered a tent. (IFC 3103.2 and 3103.4). Should you plan to erect tents or canopies exceeding these sizes, additional requirements may apply. Please discuss your plans with a Fire Inspector well ahead of your event.

- At the time of application for a tent permit please submit the following documentation covering your tent or canopy:
  - A certificate from the manufacturer indicating compliance with National Fire Protection Association (NFPA) Standard 701. (IFC3104.2).
  - Names and addresses of the owners of the tent or canopy. (IFC 3404.4[1]).
  - Date the fabric was last treated with a flame-retardant solution, firm applying, and name of testing agency. (IFC 3404.4[2][3][4]).
- Your tent application will require a detailed floor plan if the occupant load is 50 or more persons. (IFC 3103.6).
- Tents and canopies shall be installed to withstand the elements of weather as well as to prevent collapsing. (IFC 3103.9).
- Exits must be clearly marked and illuminated if the exit serves an occupant load of 50 or more. (IFC 3103.12.6).
  - Exit curtains (if installed) shall be of colors that contrast with the color of the tent. (IFC 3102.12.3[2]).
- Provide portable fire extinguishers (minimum Classification 2A:10BC), the number and type appropriate to the environment being protected. (IFC 3606.4.4). Please check with a PFD Fire Inspector if you are unsure what is needed.
- Open flame, fire or heat-producing devices are not permitted inside or within 20 feet of a tent. (IFC 3107.4).
- No hay, straw or similar combustible material can be located within a tent or membrane structure except for materials necessary for the daily care and feeding of animals. Sawdust and shavings are permitted for public performances if kept damp. (IFC 3107.2).
- A tent or membrane structure which will be utilized as a “special amusement building” (haunted house, portable carnival attraction, etc.) may require special fire protection equipment. Please discuss your plans with a fire inspector should you anticipate having an attraction of this type. (IFC 3103.9 and IBC [International Building Code] 411.1).

### **Bounce Houses/Inflatables**

- Bounce houses or other inflatables must be secured to withstand weather and to prevent collapsing. (IFC 3103.9).

### **Fire Lanes**

- Fire apparatus access roads (fire lanes) must remain unobstructed with a minimum width of 20 feet and unobstructed height to 13 feet 6 inches. (IFC 504.4 and IFC 503.2.1). **Additional requirements are in effect for events around the Courthouse Plaza and at the Gateway Mall.**
- Special requirements for events around the Courthouse Plaza:
  - Fire lanes to be maintained to a width of 26 feet under the authority of IFC 503.2.2.
  - Fire lanes should be kept on the opposite sides of the courthouse on all roadways.
- Special requirements for events around Prescott Gateway Mall:
  - The posted signs which designate the fire apparatus access road around the mall shall be observed. (IFC 503.4).
- For the purpose of providing required egress from the mall, there shall be a minimum of 10 feet clear exit width between any storefront or kiosk and the nearest display. Displays and events may not obstruct the means of egress travel. (IFC 1001.2).
- Maintain a 12 ft. fire break passageway or fire road free of guy ropes or other obstructions around tents or membrane structures. (IFC 3103.8.6).

- Maintain unobstructed access to fire hydrants, drafting sources or other fire protection features. (IFC 3106.2.3.1).

### **Generators/Electrical**

- Portable generators and temporary wiring must comply with the provisions of NFPA 70. Large generators must be properly grounded. An 8-ft. rod is required. Since the ground in many locations has a layer of caliche, the rod can be inserted at a 45-degree angle (IFC 3106.1).

### **Fires**

- An additional permit is required for any bonfire. This must be discussed in advance with a fire official prior to the event. (IFC 307.2).
- The fire code official may order extinguishment should conditions warrant. (IFC 307.3).
- Compliance with any fire restrictions (Stage I, II or III or No Burn Days) which might be in affect at the time of the event is required. (IFC 307.1.1).

### **Fireworks/Pyrotechnics**

- A separate permit is required for any fireworks/pyrotechnics display. Pertinent information on the company managing the display must be provided. (IFC 105.6.14).
- Public fireworks displays must be supervised by a fire code official. (IFC 5601.5).

### **Medical Standby**

It may be necessary for you to arrange for emergency medical personnel to stand by at your event and/or a first aid station. Exact requirements will vary based on the type of event and the anticipated number of attendees. This should be coordinated with PFD as early in your planning as possible.

## ADDENDUM – FIRE CODE REQUIREMENTS FOR MOBILE FOOD UNITS (MFU)

Following are the requirements for mobile food units (MFU). Please ensure that food vendors are provided copies of these requirements.

MFU's are defined as "food trucks" or "trailers" and are required to have been inspected by a fire official of any Arizona fire jurisdiction within the previous year as well as the Yavapai County Department of Health Services. If MFU's cannot produce a current fire inspection report they will be subject to inspection by PFD fire officials prior to commencement of the event. Should the MFU be found to not be in compliance with applicable IFC provisions and Title 9 of the Arizona Revised Statutes Section 485 et seq. relative to municipal regulation of MFU's, the business owner will be informed and that unit will not be permitted to operate at the event. In the interest of public safety, the MFU will be required to be removed from the event venue. It is highly recommended that if an MFU has not received a fire inspection (not to be confused with fire protection equipment service by the vendor's fire protection equipment service provider) in previous 12 months that a fire inspection be completed prior to arrival at the event. The required fire inspection may be completed by any Arizona fire authority or past fire department.

### General Requirements

1. Portable fire extinguishers (2A:10BC or greater) must be installed in kitchen cooking areas. (2017 NFPA 96:10.9.3) (2018 IFC 906.3).
2. Cooking appliances that product grease-laden vapors must be protected by a listed Class-K fire extinguisher. (2017 NFPA 96:10.9.2) (2018 IFC 906.4).
3. In LP gas systems, a flexible connector must be installed between the regulator outlet and the fixed piping system. (2017 NFPA 58:6.26.5.1[B]).
4. LP gas containers installed on the vehicle must be securely mounted and restrained to prevent movement. (2018 IFC 319.8.2).
5. LP gas system piping, including valves and fittings, must be adequately protected to prevent tampering, impact damage and damage from vibration. (2018 IFC 319.8.4).
6. Maximum aggregate capacity of LP gas containers transported on the vehicle and used to fuel cooking appliances only, shall not exceed 200 pounds propane capacity. (2018 IFC 319.8.1).
7. A listed LP gas alarm must be installed within the vehicle in the vicinity of LP gas system components in accordance with the manufacturer's instructions. (2018 IFC 319.8.5).
8. LP gas containers installed on the vehicle and the fuel gas piping system must be inspected annually by an approved inspected agency or a company that is registered with the U.S. Department of Transportation to requalify LP gas cylinders to ensure that system components are free from damage and suitable for intended service and not subject to leaking. (2018 IFC 319.10.3).
9. Cooking equipment that produces grease-laden vapors must be provided with a kitchen exhaust hood in accordance with 2018 IFC Section 607. (2018 IFC 319.3).
10. The exhaust system including the exhaust hood, grease-removal devices, fans, ducts, and other appurtenances must be inspected and cleaned in accordance with 2018 IFC Section 607. (2018 IFC 319.10.1).

11. Cooking equipment must be protected by an automatic fire extinguishing system in accordance with 2018 IFC Section 904.12. (2018 IFC 319.4.1).
12. Fire protection systems and devices must be maintained in accordance with 2018 IFC Section 906.1. (2018 IFC 319.10.2). [Every 6 months for automatic fire extinguishing systems and every 12 months for portable fire extinguishers.]

### **Solid Fuel Operations**

1. Solid fuel must not be stored above any heat producing appliance or vents. (2017 NFPA 96:14.9.2.2).
2. Solid fuel must not be stored closer than 3 feet from any cooking appliance. (2017 NFPA 96:14.9.2.2).
3. Solid fuel must not be stored near any combustible or flammable liquids, ignition sources or chemicals. (2017 NFPA 96:14.9.2.7).
4. Solid fuel must not be stored in the path of the ash removal or near removed ashes. (2017 NFPA 96:14.9.2.4).
5. Ash, cinders and other fire debris should be removed from the firebox at regular intervals and at least once a day. (2017 NFPA 96:14.9.3.6.1).
6. Removed ashes, cinders and other removed debris should be placed in a closed metal container located at least 3 feet from any cooking appliance. (2017 NFPA 96:14.9.3.8).
7. All solid fuel appliances (whether under a hood or not) with fire boxes of 0.14 cubic meters or 5 cubic feet volume or less shall have at least a 2A rated water spray fire extinguisher or a 6 Liter (1.6 gallon) wet chemical fire extinguisher listed for Class K fires in accordance with NFPA 10, with maximum travel distance of 6 meters (20 feet) to the appliance. (2017 NFPA 96:14.7.8).

### **General On-Site (These items can only be verified on-site. Compliance is required at every event.)**

1. Maintain 10-foot clearance from buildings, structures, vehicles and any combustible materials. (2017 NFPA 96:7.8.2; 96:7.8.3).
2. Fire lanes and fire department vehicular access roads must be maintained. (2018 NFPA 1:18.2.4) (2018 IFC 503.4).
3. Clearance must be provided for fire department connections and fire hydrants. (2018 NFPA 1:13.1.3-5) (2018 IFC 509.2).
4. Fuel tanks must be filled to capacity needed for uninterrupted operation during normal operating hours. (2018 NFPA 1:10.14.10.1).
5. Ensure that refueling is conducted during non-operating hours. (2017 NFPA 96:B.18.3).
6. Engine sources of power must be separated from the public by barriers (guards, fencing, enclosure, etc.). (2017 NFPA 96:B.16.2.2).
7. Ensure any engine-powered source of power is shut down prior to refueling. (2018 NFPA 1:11.7.2.1.2).
8. Exhaust from engine-driven source of power must comply with the following:
  - a. Located at least 10 feet in all directions from openings and air intakes. (2017 NFPA 96:B.13).
  - b. Located at least 10 feet from every means of egress. (2017 NFPA 96:B.13).
  - c. Directed away from all buildings. (2018 NFPA 1:11.7.2.2).
  - d. Directed away from all other cooking vehicles and operations. (2018 NFPA 1:11.7.2.2).
9. Operate cooking equipment only when all windows, service hatches and ventilation sources are fully opened. (2017 NFPA 96:14.2.2, 96:14.2.3).

## PORTABLE TOILET SCHEDULE

There are a few factors to consider when trying determining how many toilets you will need. First is the number of people that are expected to attend. A good estimate is to figure one toilet for every 50-100 people you expect to attend.

If the event is expected to have a larger female attendance it is better to have about two for every 100 people. Females will require a little more time in the toilet and could cause a line of unhappy people.

An event that will be serving alcohol will also need to factor in extra toilets. A good estimate for an event that is serving a great deal of beverages is about one toilet for every 50 people expected to attend. It is important to plan ahead for the extra usage that will occur in this type of situation.

If the event location is very isolated extra toilets are a good idea. If people will be making the event an all day or all night excursions, they will not have the option of waiting until they get home to use a restroom. The length of the event also plays a role in determining how many toilets you will need. A portable toilet can sustain regular use for about six hours, before needing emptying.

Concerts or performances that will have intermissions may want to plan ahead and have extra toilets on hand, for the rush periods. This can help keep lines down and make the attendees much happier.

It is important to consider any attendees who may need a wheelchair accessible toilet. At least one handicap accessible toilet at any event is ideal. There are some laws that may require you to have at least one available.

It is important to be safe rather than sorry when it comes to a shortage of toilets. Your guests will appreciate their needs being considered, and a good impression of your event.
