Proposal for Adoption of an Updated Fee Schedule for the Prescott Fire Department's Community Risk Management Division

Overview:

The Prescott Fire Department (PFD) Community Risk Management Division is proposing an updated fee schedule, the first modification since its adoption in 2016. This proposal seeks to address the critical need for updated fees, ensuring that the Division can provide exceptional services and maintain financial sustainability. The updated fee schedule will incorporate a minor revision of existing fees, with adjustments based on the Consumer Price Index (CPI) increase since 2016, which aligns with the methodology of the City's Community Development Department.

Key Points:

- 1. Lack of Updates Since 2016: The current fee schedule has not been revised or updated since 2016. As a result, PFD has missed the opportunity to capture critical revenue, which impacts the Division's ability to provide the level of service expected by the community. This revenue loss places a strain on the Division's ability to adequately fund operations, invest in resources, and ensure safety. Furthermore, a rough estimate indicates that approximately 60% of plan review and inspection services' costs are not being recovered in the current fee schedule.
- 2. Justification of Fees: Prescott Fire Department dedicates significant resources to providing construction-related services, including reviewing building plans, conducting on-site inspections, and ensuring that fire safety measures are implemented correctly. These tasks require specialized knowledge, training, and equipment. Permit fees help recover the costs associated with these services, ensuring that taxpayers are not bearing the full financial burden of these essential activities. This model of cost recovery allows the fire department to remain financially sustainable while continuing to provide high-quality services. Our

PRESCOTT FIRE DEPARTMENT

Community Risk Management Division

budgeted amount for providing these resources exceeds the amount of money being collected in fees, therefore it is putting an undue burden on the city's general fund.

- 3. Methodology for Fee Update: The proposed update will adjust the current fee schedule by applying the December's CPI increase from 2016 to the present. This allows fees to remain consistent with inflation and cost increases across the broader economy and aligns with the preexisting methodology the City's Community Development Department uses within their adopted fee schedule. Furthermore, the CPI data used the month of December for the years 2017 2024 to determine percentage increase year over year. By adopting this CPI-based methodology, we can align with community standards and ensure our fees remain relevant over time.
- 4. **Proposed Annual CPI Escalator:** The proposal recommends implementing an annual CPI escalator to adjust fees on a regular basis. This would allow the Division to keep pace with inflation and avoid future periods of revenue stagnation. The annual CPI adjustment would remain in effect until such time as a more comprehensive fee study and cost recovery model can be completed for the Fire Department.
- 5. Need for a Comprehensive Cost Recovery Fee Study: There is a critical need for a full cost recovery study to better assess the true costs of providing fire services. This study would establish a comprehensive and data-driven fee schedule that reflects actual costs and supports financial sustainability. It is assumed that this study will reveal the need to increase fees significantly from the current model or cost recovery. We recommend that this cost recovery study be conducted across all city services, not just within the Community Risk Management Division, to ensure fairness and accuracy in the city's overall fee structure.
- 6. **Comparison to Regional Fire Departments:** The proposed updated fee schedule is comparable to the fee schedules of the Central Arizona Fire and Medical Authority (CAFMA) and other regional fire departments, many of which have adopted cost-recoverable fee structures. These neighboring departments provide a useful

PRESCOTT FIRE DEPARTMENT

201 N. Montezuma Street, Ste. 216 Prescott, Arizona 86301

Community Risk Management Division

benchmark for ensuring that Prescott Fire's fees are competitive, fair, and sustainable.

Recommendations:

- Adopt the proposed updated fee schedule with adjustments based on the CPI increase since 2016.
- Implement an annual CPI escalator for future fee updates, ensuring fees adjust with inflation and service delivery costs.
- Conduct a thorough cost recovery fee study for the Community Risk Management Division, as well as for all city services, to develop a more accurate and sustainable fee schedule that reflects true service costs.

Appendix A is the proposed 2025 fee schedule. Appendix B is the comparable table demonstrating the current fee schedule with the proposed and the value delta for each.
