Streets Division Administration Building

April 2025

ROADWAY PROJECT

As the old Wastewater Treatment Plant (WWTP) at 1500 Sundog Ranch Road is relocating to the Airport Treatment Facility, portions of the old site will be decommissioned. The Streets Maintenance Division will be incrementally relocating their operations to vacated portions of the old treatment plant.

The City has acquired the steel building components of a 125' X 125' building. The building components are stored at the old wastewater treatment plant on Sundog Ranch Road, and at other City owned facilities. This project includes retrofitting the building components to suit the future needs of the Streets Division.

The Design/Build Team of Danson Construction/Kimley-Horn and Associates was chosen for design and eventual construction. The design contract was awarded to Danson Construction on January 9, 2024.

Construction of Phase 3 is underway with construction of the under-slab utility lines being the first order of work. Construction of the concrete building slab is nearing completion. Erection of the building is expected to start by mid-April, 2025.
