Water Production Facility & Intermediate Pump Stations

September 2025

UTILITY PROJECT

The project design consultant, Water Works Engineers, and the Construction Manager at Risk (CMAR) contractor, Fann Environmental LLC / Fann Contracting, Inc. joint venture, have been awarded the project. The project consists of two locations: The City's Water Production Facility (WPF) located in Chino Valley, and a new Intermediate Pump Station (IPS) to be located west of Willow Creek Road near the Airport.

Chino Water Production Facility:

The pump station building is complete. Electrical component testing has been completed; control programming, network wiring, link communication, and operational testing completed. Final connection to the system and operational status has been achieved. The site is now online; the old site's decommissioning and deconstruction is underway, old pumps, electrical, and infrastructure are being removed. Abandonments and piping alterations to isolate old underground is being completed.

Intermediate Pump Station:

The pump station building is complete. Control programming and network link communication are complete. Tank integrity, internal pipe coating, disinfection, filling, site pipe flushing, and pump startup have all been completed. Electrical component testing, control programming, network wiring, link communication, and operational testing have been completed. The pump station is operational and working together with the WPF facility. Final small detail items are being completed.
