Yavapai Hills #1 Lift Station Rehabilitation

September 2025

UTILITY PROJECT

This project will upgrade an old, inefficient sewer lift station by constructing additional wet wells and pumps. The rehabilitation will provide additional capacities to handle future build out flows from the Yavapai Hills Subdivision.

Water Works Engineers are the design engineers for the project. Fann Environmental has been awarded the construction contract for this project. Testing of the Polymer Splitter box and Wet Well is complete. The project is expected to be completed in the fall of 2025.
