Sundog Trunk Main Phase C3 Project

November 2025

UTILITY PROJECT

The project includes the design and construction of a regional lift station located near Granite Creek Park and approximately 25,000 linear feet of 18" sewer force main. The project also includes approximately 2,500 linear feet of 24" sewer trunk main and an 8" branch main.

The design contract has been awarded to Lyon Engineering and Surveying, Inc. Lyon and City staff are currently working with property owners in acquiring the lift station site along with needed easements. The project design is 60% complete. Geotechnical investigation along the force main route is complete. Construction is expected to begin in early 2026.
