## **Pleasant Street Pavement and Drainage Repairs**

January 2026

### **ROADWAY PROJECT**

The project generally consists of roadway and utility trench improvements along Pleasant Street between Carleton Street and Aubrey Street. The primary scope of work is to repair excessive settling along utility trenches that has created uneven pavement and unsafe driving conditions.

Work includes the removal and replacement of the utility trench backfill material, damaged concrete curb and gutter, damaged storm drain pipe, catch basins, asphalt pavement, and utility adjustments.

The design is complete, and the construction contract was awarded to Asphalt Paving & Supply, Inc. at the August 26<sup>th</sup> Council meeting. Construction started on October 20<sup>th</sup>. The City plans to complete construction by February 2026.
