## Country Park Pavement Rehabilitation

February 2026

### **ROADWAY PROJECT**

The project involves pulverizing the existing asphalt pavement along Country Park Drive, Robbie Lane, Pine Cove Road, and Woodland Hills Road. The deteriorated asphalt will be ground in place, re-graded, and overlaid with new asphalt. Existing drainage problems within the project limits will be addressed, guardrail and posts along the roadway will be repaired as needed, and utilities will be adjusted to match the new roadway elevation.

This project is being designed in-house. Preliminary 30% design plans have been distributed to utility companies for review of potential utility conflicts.
