Goldwater Lake Road Reconstruction

March 2026

ROADWAY PROJECT

This project includes pulverizing and repaving the entrance road to Goldwater Lake. The existing asphalt is in very poor condition and has deteriorated to the point that two-way traffic can no longer safely operate within the paved section. Pulverizing the existing roadway and placing new asphalt will restore roadway width, improve safety, and provide a durable driving surface for residents, visitors, and service vehicles accessing the lake.

Construction is scheduled for June 2026. This work will require a temporary closure of the lake during construction. is scheduled to take place in June 2026. This work will require the closure of the lake.
