Pine Crest Concrete Roadway Repairs

May 2026

ROADWAY PROJECT

The project will focus on removing and replacing damaged sections of the existing concrete roadway to restore structural integrity, ride quality, and safety while maintaining the character of the Pine Crest subdivision. This approach extends the service life of the roadway without altering its original appearance, preserving the historic concrete streets that define the neighborhood.

DBA will begin construction in mid- to late May 2026. This will require traffic control changes in the immediate area. Advance notice will be provided to affected residents prior to the start of work.
