South Tank Pipe Lining

May 2026

WATER PROJECT

The project generally consists of repairing leaks to existing inlet/outlet pipes and drain lines at the City owned domestic water storage tank known as the South Tank at 319 South Washington Avenue. This project consists of exploratory investigation of current conditions and creating a plan and bid ready documents to repair the leaking lines with NSF 61 approved liner for potable water.

Conсор has been selected as the design engineer for the project. Design is scheduled to be completed mid-year 2026 with construction work anticipated in October.
