Blooming Hills Sidewalk Repairs

July 2026

ROADWAY PROJECT

This project includes replacing approximately 600 linear feet of sidewalk along the south side of Blooming Hills Drive between St. James Place and the Prescott Lakes Senior Living Facility. The work also includes constructing two ADA-compliant curb ramps, repairing drainage scuppers, and completing related concrete repairs. These improvements will enhance pedestrian accessibility, address deteriorated infrastructure, and provide a safer, more accessible route for residents and visitors.

DBA Construction is the contractor for this project. Construction is anticipated to begin in mid- to late July. Eastbound traffic on Blooming Hills Drive may be detoured around the work area during portions of construction.
