## **Sundog Trunk Main Phase C3 Project**

July 2026

### **UTILITY PROJECT**

The project includes the design and construction of a regional lift station located near Granite Creek Park and approximately 25,000 linear feet of 26" sewer force main. The project also includes approximately 2,500 linear feet of 24" sewer trunk main and an 8" branch main.

During construction, temporary traffic disruptions and lane closures are expected along the project route.

Lyon Engineering have been selected to provide engineering design services for this project with current design in 100% review.
