FY27 Pavement Preservation Phase 1 Bradshaw, Newport, McDonald

September 2026

ROADWAY PROJECT

This project includes applying pavement preservation treatments to roadways within the Newport, Bradshaw, and McDonald areas. Treatments include Type 3 Micro Seal, Cape Seal, and thin asphalt overlays designed to extend pavement life and improve ride quality. The project also includes asphalt repairs in areas of pavement failure, crack sealing, mastic repairs, and repairs to curb, sidewalk, and ADA ramps. These improvements will help preserve the roadway network, improve accessibility, and provide a safer, smoother surface for residents and visitors.

Cactus Asphalt was issued a Notice to Proceed with a start date of August 18, 2026. The contractor has begun work, including asphalt and concrete repairs at various locations throughout the project area. Work will continue at multiple locations as crews progress through the project.

Residents and property owners will be notified in advance of any work that may affect traffic, parking, or temporary access to their properties. Temporary traffic control measures and access restrictions may be required in some areas while repairs are underway. The contractor will coordinate work activities to minimize disruptions and maintain access whenever possible.
