FY27 Pavement Preservation Phase 2 – The Ranch (south)

September 2026

ROADWAY PROJECT

This project includes applying pavement preservation treatments to portions of Lee Boulevard, West Lee Boulevard, and Rainbow Ridge Drive. Treatments include Type 3 Micro Seal, Cape Seal, and thin asphalt overlays designed to extend pavement life and improve ride quality. The project also includes asphalt repairs in areas of pavement failure, crack sealing, mastic repairs, and curb and gutter repairs. These improvements will help preserve the roadway network, improve drainage, and provide a safer, smoother surface for residents and visitors.

Sunland Asphalt has been issued a Notice to Proceed with a start date of September 8, 2026. The contractor will begin work, including asphalt and concrete repairs at various locations throughout the project area. Work will continue at multiple locations as crews progress through the project.

Residents and property owners will be notified in advance of any work that may affect traffic, parking, or temporary access to their properties. Temporary traffic control measures and access restrictions may be required in some areas while repairs are underway. The contractor will coordinate work activities to minimize disruptions and maintain access whenever possible.
