Blooming Hills Sidewalk Repairs

November 2026

ROADWAY PROJECT

This project includes replacing approximately 600 linear feet of sidewalk along the south side of Blooming Hills Drive between St. James Place and the Prescott Lakes Senior Living Facility. The work also includes constructing two ADA-compliant curb ramps, repairing drainage scuppers, and completing related concrete repairs. These improvements will enhance pedestrian accessibility, address deteriorated infrastructure, and provide a safer, more accessible route for residents and visitors.

This project was approved by City Council on August 11, 2026. Additional improvements are needed along the ditch next to the sidewalk to help prevent similar damage from occurring in the future. Engineering is currently being completed to determine the appropriate improvements. As a result, construction has been delayed until this work is complete.

Construction is now anticipated to begin later this year. During portions of construction, eastbound traffic on Blooming Hills Drive may be detoured around the work area. Additional traffic control measures will be in place as needed to maintain access and safety during construction.
