Heritage Park Pavement Rehabilitation

November 2026

ROADWAY PROJECT

The project consists of the removal and replacement of deteriorated asphalt. Some of the Heritage Park Road asphalt is deteriorated to the point where it needs to be replaced. There are sections of guardrail along the roadway where the posts are old and show signs of needing replacement. There will be some sections of existing waterline that will be repaired by the City of Prescott Water Operations; this work will be performed before the contractor begins construction.

This project is in the early 30% design phase; the anticipated start date for this project is to be determined.
