Hillcrest & Broadview Reconstruction

November 2026

ROADWAY PROJECT

Reconstruct Hillcrest Dr and Broadview Dr by removing existing pavement and installing a new 4-inch asphalt section. Improve roadway width where feasible to enhance access and safety. Replace the existing 6-inch AC water line and install new water services to ensure reliable water delivery. Address drainage deficiencies along Broadview Dr and Hillcrest Dr, including ditch, culvert, and cross-drain improvements, to reduce roadway hazards and improve long-term pavement and utility performance.

The design contract is fully executed, and the kickoff meeting has been scheduled. The 15% design plans are due in December.
