Inert Crushing at Transfer Station

November 2026

FACILITY PROJECT

At the City of Prescott Transfer Station at 2800 Sundog Ranch are two inert materials stockpiles to be crushed and screened. One stockpile is a mixture of asphalt concrete, concrete and rubble. The second material stockpile is a mixture of concrete and inert materials. The project generally consists of crushing and screening both stockpiles into 1-¼ inch minus material and stockpiling on site.

The Notice Inviting Bids was issued September 4, 2026, with bid opening October 1, 2026. Contract is pending execution with mobilization planned for the week of November 16, 2026.
