Police Substation & Property/Evidence

November 2026

FACILITY PROJECT

The project generally consists of the design and construction of a new multi-functional Police facility that will meet the Police Department's current needs and provide reasonable additional space for growth and consolidates multiple operations currently spread across various inadequate existing facilities, and centralizes these operations. The new facility will include a property and evidence storage warehouse, K9 and animal control accommodations, motors, a patrol substation, a crime lab, and space for a future indoor shooting range. The Police facility will be located on a 7.5 acres property at the northwest corner of Prescott Lakes Parkway and Storm Ranch Parkway.

Arrington Watkins was awarded a design services contract on October 14, 2025. Information was collected during design programming meetings and existing facility tours December 15 and 16, 2025. A meeting was held in January 14, 2026, to confirm and refine the programming information, and the first site layout meeting was held on January 28, 2026. A project update was presented at the November 3, 2026, Council meeting. A community meeting is scheduled for November 18, 2026. A 60% design review is planned by the end 2026. The city plans to complete design by summer of 2027.

A selection committee recommended Willmeng Construction for the CMAR pre-construction services in May 2026. The city negotiated a Guaranteed Maximum Price (GMP) pre-construction services contract with Willmeng Construction and Council

approved the contract on July 14, 2026. The CMAR will collaborate with the design team and city through the rest of the design process. The city and CMAR would like to negotiate a GMP construction services contract for site grading before the end of 2026, to start site development before design is complete, and negotiate another GMP construction services contract for vertical construction by the time design is complete, and start building construction during the spring of 2027, and complete construction by the end of 2028.
