Willow Creek Gravity Sewer

November 2026

UTILITY PROJECT

The City of Prescott's Willow Creek Gravity Sewer Project will replace the existing force main along Willow Lake Road with a new gravity sewer system. The project will eliminate the need for the Willow Lake Regional Lift Station and provide needed improvements to the Prescott Lakes Regional Lift Station, reducing long-term operation and maintenance costs while improving the reliability and efficiency of the City's wastewater collection system. This critical infrastructure improvement will also address aging sewer infrastructure and provide long-term capacity and service for the surrounding area.

Lyon Engineering have been selected to provide engineering design services for this project and are currently working towards the 100% final documents. Construction is anticipated to commence in spring of 2027.
